

Fixed Pagination Test

Table Pagination Fix

This test demonstrates proper table pagination without empty pages.

Key fixes:

- Removed `page-break-inside: avoid` from table `tbody` and `tr`
- Set `page-break-inside: auto` to allow natural breaks
- Only prevent breaks inside individual cells
- Maintain header repetition across pages

Large Table Test

The following table should break naturally across pages without empty pages:

ID	Name	Email	Department	Position	Salary	Status	Notes
1	Employee 1	employee1@company.com	Department 2	Position 2	\$97,467	Active	This is a longer note for employee 1 that might wrap to multiple lines to test cell content handling.
2	Employee 2	employee2@company.com	Department 3	Position 3	\$75,294	Inactive	This is a longer note for employee 2 that might wrap to multiple lines to test cell content handling.
